Product Overview

Product Overview

Henco is the perfect fit.

At Henco everything is about the perfect connection. Our aim is ensuring that all installers can connect our multilayer pipes correctly, quickly, and easily, which leads to a more efficient installation process. Our goal is to empower installers and merchants with knowledge about the Henco product range. Every day, for every project, Henco is the perfect fit.

Within this catalogue you will be introduced to the patented Henco multilayer pipe range, our press fittings that have features to help improve installations and our full underfloor heating options. With over 30 years in manufacturing, you can be confident that our products offer reliability and durability. Every installer is backed up with MyHenco, your digital sidekick that is the perfect platform to view technical data sheets, best practice webinars and much more.

Product standards

Henco manufactures and delivers a complete and coordinated range of products that stands out for their reliability and continual technological advancements. With numerous international certifications including WRAS and KIWA, you can be confident that Henco products are the perfect fit.

Multilayer pipe – The heart of our range

Our patented multilayer pipe is the backbone of the Henco range. At Henco we truly believe “only the best is good enough” and this is why our pipe meets the highest standards to give the installer the confidence that they are using the right product.

Wide range of products

Adding to our multilayer pipe range Henco offers a wide range of high-quality fittings. Giving installers the choice of press and push fittings, each offering many variations from compression fittings, valves, and a wide range of manifolds. Henco understands that every installation needs the correct tools and that is why we offer a wide range of hand tools and press machines to make sure the installation is done not only the efficient way, but the correct way.

Henco Underfloor Heating

Henco offers a full comprehensive range of products suitable for underfloor heating installations.

Research and development

Henco has a dedicated team that focusses on improving our current product ranges and looking at new advanced solutions to meet the demands and needs of an ever-changing market. We not only look at what the industry requires, we also give the installers a voice and listen to their day to day requirements. Our focus on research and technical progress means our aim is to always offer our customer the best products backed up with the latest technology.

Aalberts NV – Empowered by a larger group

Henco is proud to be part of Aalberts NV who are a global technology company, focused on creating innovative solutions for various industries. Being a part of the Aalberts family means we can use their expertise in technology and manufacturing to help deliver the highest quality Henco products.

Henco Sustainability

Sustainability, also our concern

Henco products are suitable for hot-cold water installations, central heating installations and underfloor heating installations.

Switching to Henco's multilayer pipe and fittings can immediately make improvements to an organisation's sustainability requirements compared to other alternative materials. The manufacturing process of multilayer pipe has a lower environmental impact and the overall energy consumed is lower compared to alternative materials.

For Henco, this is not enough. We firmly believe in the 3 P's: People, Planet, Profitability.

Corporate sustainability for us means a key focus on these three pillars, setting firm policies and strategies for our internal & external employees and reinvesting the company's profits back into Henco and helping to reach the goal of becoming net zero carbon by 2050. At Henco we manage, measure & monitor both our energy consumptions and our CO2 emissions. It is our objective to decrease our CO2 intensity for scope 1 and 2 by 70% by 2030, taking 2019 as a base line year.

ISO14001 certified

All the effort we put into environmental matters resulted in Henco getting through the certification audits for ISO14001. After 3 days of audits on various business processes, we achieved a very positive audit result without any recorded remarks. The auditor praised, among other things, the enthusiasm of our employees and the broad demonstration of sustainability throughout our processes.

Aalberts Sustainability Award 2021

Aalberts also saw that we at Henco value sustainability and that we show this through all our actions. In 2022 we were very pleased to accept the Aalberts sustainability awards 2021.

The VOKA sustainability charter: SDG pioneers

The VOKA sustainability charter was achieved by Henco for the 3rd year in a row. With this, we have officially been appointed as SDG pioneers. Sustainability is held in high esteem at Henco, this certificate proves it and we are proud of it.

Environmental and health statement Cochebat

The French HVAC association Cochebat has tested and approved our Henco multilayer pipes and we were rewarded with inclusion in their Environmental and Health Statement.

Interseroh Certificate Resources Saved

In 2020 and 2021 Henco received the Interseroh Certificate for Resources Saved in Germany. By recycling materials in 2021, a calculated 42,269 kilograms of resources and, in addition to this, 5,521 kilograms of greenhouse gases were saved.

Sprinkler Cup: see **chapter 12** on Sprinkler systems

The **VdS seal** stands for reliable and long-term effectiveness, which has been tested in comprehensive endurance tests and according to practical VdS guidelines (including DIN/EN and all CEA requirements). VdS-approved products ensure not only the greatest possible protection but also high savings through minimised false alarms, less maintenance and tested durability. VdS product certification is therefore an excellent basis for being perceived as a premium supplier on the market for fire protection and security technology.

Base plate for inliner

The Henco ECO-line is an energy saving solution for recirculation loops, which limits heat loss between supply and return pipe.

A separate pipe for the circulation water is no longer required. Designed on the Henco Super Size concept, it also combines modularity and easy installation.

One concept for all dimensions from 40 up to 75mm

- ✓ Cost effective
- ✓ Easy installation
- ✓ Less space consumption
- ✓ Anti legionellosis
